**Digital Watchdog** - Digital Watchdog offers a level of specialty in the manufacturing and deployment of analogue and IP video security technology that your business can rely upon. Their highly refined production process offers substantial savings to customers.

**OnSSI** - Award winning On-Net Surveillance Systems Inc., develops advanced non-proprietary, open architecture, Intelligent IP Video Surveillance software. Ocularis, OnSSI's flagship IP-video and security management platform, is a comprehensive video management system that combines powerful network video recorders (NVRs) with physical security information management (PSIM) functionality. As an integrated video and event management platform, it includes a full-fledged video management system (VMS) for streaming, recording and managing an unlimited number of cameras at multiple sites.

**Rasiliant** - Rasiliant's enterprise-class storage system technology is purpose built and optimized for video surveillance. Their PixelStor technologies and its patent pending storage software algorithms achieve up to 20x the performance of general purpose storage products. They combine new leading edge industry standard, high performance SSB components with their PixelStor high performance video surveillance storage software to provide a revolutionary video surveillance storage solution.

**Veracity** - Veracity designs, develops and markets innovative transmission, storage and display products primarily for network video surveillance applications. Veracity focuses on transmission and display solutions, particularly for high-bandwidth megapixel IP camera systems. Their aim is to support the evolution and deployment of megapixel video surveillance designing unique products which solve real-world IP Video problems.

**SoleraTec** - SoleraTec's Phoenix product family provides affordable video content management, production video management, eDiscovery and email archiving, long-term archiving, digital surveillance video management, live surveillance video capture, and ultra-fast search and retrieve—even when needed data and video is stored offline. Phoenix runs on Windows, Macintosh, and Linux and supports a wide selection of storage hardware. SoleraTec is partnered with Milestone, OnSSI, Veracity USA and others.

**Orion Images** - Orion Images specializes in designing, developing and manufacturing LCD commercial displays targeting a diverse range of market segments. Offering world class value, reliability and innovative technology in a wide range of screen sizes from 2.5" up to 70".

**Razberi Technologies** - offers a full range of plug-and-play network recorders, IP cameras and installation tools. The company's flagship product is the razberi™ ServerSwitch NVR with embedded video management software. The razberi™ ServerSwitch is an appliance that combines the functions of a network video recorder, high powered Ethernet switch, and a choice of video management software from industry leading technology partners. Ideal for small to mid-sized systems, as well as an add-on to existing enterprise systems.
